

1. Label Studio Shortcuts & Navigation

Key	Label / Action	Bounding Box Extent	Control	Function
1	eyes_closed	Separate box per eye	Ctrl + Enter	Submit & Next Frame
2	yawning	Mouth region only	Mouse Wheel	Zoom Canvas In / Out
3	head_down	Full head / face	Ctrl + Drag	Pan Canvas while Zoomed
4	hand_over_mouth	Full head / face	Delete / Bksp	Delete Selected Box
5	phone_use	Hand + phone together	Ctrl + Z	Undo Last Edit
6	head_turned_away	Full head / face	Empty Frame	Ctrl+Enter (Negative Sample)

2. The 6 Frozen Target Cues & Bounding Box Rules

Cue & Key	Visual Definition	Bounding Box Extent	Strict Exclusions (DO NOT ANNOTATE)
[1] eyes_closed	Visibly fully closed, partially closed, or heavy-lidded eyes.	Separate tight box per eye. Annotate Left and Right eyes individually.	- Never draw 1 box across both eyes. - Downward gaze with open slit is NOT closed. - Unverified glare/shadow is NOT closed.
[2] yawning	Visibly active yawn distension / deep inhalation posture.	Mouth region only. Tight rectangle around lips/mouth.	- Talking/singing open mouth is NOT yawning. - Do NOT enclose the entire face/head.
[3] head_down	Head clearly and substantially lowered/slumped forward.	Full head and face. Crown of hair down to jaw/chin.	- Minor downward eye glances are NOT head down. - Must represent substantial cervical flexion.
[4] hand_over_mouth	Hand/fingers visibly touch, cover, or occlude mouth.	Full head and face. Enclose entire head + occluding hand.	- Hand resting on chin without covering mouth aperture is NOT hand over mouth. - Hand on steering wheel is NOT hand over mouth.
[5] phone_use	Active handheld smartphone holding, texting, or interacting.	Hand + Phone together. Enclose phone and interacting hand.	- Phones resting passively on console/mount are NOT phone use. - Hands-free voice calls are NOT phone use.
[6] head_turned_away	Head substantially turned left, right, or away from road.	Full head and face. Enclose entire visible head profile.	- Minor standard mirror glances (5°–15°) are NOT turned away. - Must be a substantial departure from forward road view.

3. Protocol Rules & Edge Case Decision Matrix

Scenario / Ambiguity	Correct Action	Authoritative Benchmark Rationale
Driver looking down at dash/cluster; eye slit open	0 Boxes (Negative)	Downward gaze is not closed eyes; head is not substantially slumped forward.
Driver yawning while hand visibly covers mouth	Both Boxes	Annotate hand_over_mouth (Full Head) AND yawning (Mouth). Overlapping boxes are expected.
Driver holding phone near ear with hand visible	phone_use	Annotate phone_use around hand + phone together (active handheld phone manipulation).
Extreme glare / shadow / inconclusive cue visibility	0 Boxes (Conservative)	Do not guess or create speculative boxes without clear, conclusive visual evidence.
Single Static Frame Isolation Principle	Current Frame Only	Judge strictly by visible pixels in the current image. Do not infer blinks or motion from video memory.
