

■ 1. Label Studio Shortcuts & Navigation

Key	Label / Action	Bounding Box Extent	Control	Function
1	eyes_closed	Separate box per eye	Ctrl + Enter	Submit & Next Frame
2	yawning	Mouth region only	Mouse Wheel	Zoom Canvas In / Out
3	head_down	Full head / face	Ctrl + Drag	Pan Canvas while Zoomed
4	hand_over_mouth	Full head / face	Delete / Bksp	Delete Selected Box
5	drinking	Face + bottle together	Ctrl + Z	Undo Last Edit
6	phone_use	Hand + phone at ear	0 Boxes	Ctrl+Enter (Negative Baseline)
7	head_turned_away	Full head / face	Canvas Reset	Double-click canvas to fit

■ 2. Target Warning Cues & Bounding Box Rules

Cue & Key	Visual Definition	Bounding Box Extent	Strict Exclusions (DO NOT ANNOTATE)
[1] eyes_closed	Visibly fully closed, partially closed, or heavy-lidded eyes.	Separate tight box per eye. Annotate Left & Right eyes individually.	• Never draw 1 box across both eyes. • Downward gaze with open slit is NOT closed. • Glare/shadow is NOT closed.
[2] yawning	Visibly active yawn distension / deep inhalation posture.	Mouth region only. Tight rectangle around lips/mouth.	• Talking/singing open mouth is NOT yawning. • Do NOT enclose the entire face/head.
[3] head_down	Head clearly and substantially lowered/slumped forward.	Full head and face. Crown of hair down to jaw/chin.	• Minor downward eye glances are NOT head down. • Must represent substantial cervical flexion.
[4] hand_over_mouth	Hand/fingers visibly touch, cover, or occlude mouth.	Full head and face. Enclose entire head + occluding hand.	• Hand resting on chin without covering mouth aperture is NOT hand over mouth. • Hand on wheel is NOT hand over mouth.
[5] drinking	Active drinking with bottle, cup, or can at mouth/face.	Face + bottle together. Enclose face and beverage container.	• Passive bottles in cup holders are NOT drinking. • Must depict active consumption posture.
[6] phone_use	Active handheld phone call (holding phone to ear/head).	Hand + phone at ear. Enclose phone, hand, and adjacent ear.	• Texting / lap browsing is EXCLUDED. • Hands-free voice calls are NOT phone use. • Mounted phones are NOT phone use.
[7] head_turned_away	Head substantially turned left, right, or away from road.	Full head and face. Enclose entire visible head profile.	• Minor standard mirror glances (5°–15°) are NOT turned away. • Must be a substantial departure from forward view.

■ 3. Protocol Rules & Edge Case Decision Matrix

Scenario / Ambiguity	Correct Action	Authoritative Benchmark Rationale
Driver looking down at dash/cluster; eye slit open	0 Boxes (Negative)	Downward gaze is not closed eyes; head is not substantially slumped forward.
Driver yawning while hand visibly covers mouth	Both Boxes	Annotate hand_over_mouth (Full Head) AND yawning (Mouth). Overlapping boxes expected.
Driver holding phone to ear during call	phone_use	Annotate phone_use around hand + phone at ear (calling sense only; texting excluded).
Driver drinking water from bottle at lips	drinking	Annotate drinking around face + bottle together (active consumption).
Single Static Frame Isolation Principle	Current Frame Only	Judge strictly by visible pixels in the current image. Do not infer blinks/motion from video memory.
